

FIN-X '07

PROCEEDINGS, KEYNOTE BOOK, TRAINING MANUALS AVAILABLE

The FIN-X '07 Conference Proceedings on CD, our Keynote Presenter's book on *Saving American Manufacturing* and CCAI's popular Training Manuals are being offered at our special Show Pricing through December 31, 2007. Review the descriptions below and then use the "fillable" pdf order form below to place your order and save on these outstanding resources.

FIN-X '07 Conference Proceedings - \$75

More than 50 presentations from the FIN-X '07 Technical Conference are included on the Conference Proceedings CD. Presentations included on the CD are as follows:

Introducción al Recubrimiento de Polvo en Espanol

- A. Sistemas de Petratamiento
- B. Principios Basicos de la Pintura en Polvo
- C. Diseño de Sistemas de Pintura de Polvo
- D. Equipos Para Aplicacion de Recubrimiento en Polvo

Fundamentals of Porcelain Enamel

Running Efficient Batch Systems

- A. Batch Paint Systems
- B. Batch Pretreatment

Finishing Around the World

- A. Asia
- B. North America
- C. Europe

Finishing Quality

- A. Pretreatment Chemistry and Options for the User

System Considerations for Electrocoating

- A. Electrocoating Basic Equipment and Components
- B. Part Conveyance Material Handling Systems for Electrocoating Applications

Finishing State-of-the-Art

- A. Advances in Powder Coating
- B. Liquid Coating Application Equipment: Not Your Father's Finishing Equipment

UV Curing Today

Compliant Metal Finishing – Part I

- A. Powder Coatings 2007 - State of the Art
- B. DIP Conversion Coatings Creating Excitement in Finishing
- C. What's Going on with Pretreatments? "Chrome Free"; "Phosphate Free"; Dry-In Place
- D. Paint System Equipment Upgrades for Environmental Compliance

Best Practices: Cost Reductions

- B. Color Change: Fast and Getting Faster
- C. Increasing First Time Quality & Cost Savings by Reducing Dirt Defects

Electrocoating Today

- A. Common Coating Defects
- B. Outsourcing Options for Finishing
- C. Improving Finishing Process Performance
- D. Powder or Liquid Over E-Coat

Emerging Technologies

- A. Virtual Paint Training System
- B. Pulse Power II – The Next Generation in Powder Application Technology
- C. Open Air Plasma Treatment for Improved Coating Adhesion on Plastics
- D. Improved Transfer Efficiency with Application Technology
- E. New Conversion Coating Technologies
- F. Flexibility in Liquid Robotic Applications
- G. Non-Phosphorus Silane Treatments
- H. Clingier is Better - An Innovation for Batch Pretreatment

Compliant Metal Finishing (Part II)

- E. Vehicle End-of-Life Legislation
- F. Compliant Liquid Coatings
- G. Choosing Your Best Coating Solution for Aluminum Extrusions

Porcelain Enamel Today

- A. What is Porcelain Enamel?
- B. New Porcelain Application Technique
- C. Product Design, Validation and Launch: Getting it Right the First Time

Curing: Everything You Need to Know

Running an Economical Powder Coating System

Pretreatment General Session

- A. Cleaning Prior to Pretreatment
- B. Conversion Coatings in 30 Minutes
- C. Zinc Phosphate Chemistry and Functions
- D. Analysis of Post Treatments

The Business of Finishing

- A. Last Painter Standing: HUFFY Corporation
- B. American Success Story

Stripping

- A. Best Practices in Parts Stripping
- B. Mechanical Paint Stripping

Energy: A Hot Topic

- A. Energy Considerations: Building a Case Study
- B. Calculating Energy Costs

SAVING AMERICAN MANUFACTURING - \$32

Saving American Manufacturing is about what we have to do to stop the decline of U.S. manufacturing. The book assumes that there is only so much manufacturers can do to reduce their costs and make their internal processes more efficient. To compete in the globalized economy of the 21st century is going to take more than cost reduction.

Specifically the book outlines the changes that are necessary for manufacturers to not only survive and compete, but to get back on a track of growth by:

- Finding new customers and markets
- Increasing the probability of success with new products
- Creating new channels of distribution
- Adding specialized services
- Changing to a new type of organization
- Paying more attention to cost accounting and pricing
- Improving workforce education and training
- Developing a growth plan

It is the first book written specifically for America's small and midsize manufacturers, which are 98% of all manufacturing locations. It is the first book that moves the argument for stopping the decline of manufacturing from defensive solutions such as cost reduction to offensive solutions that are customer driven. It is about going on the attack and finding ways to grow, rather than treading water in open ocean hoping that we will be rescued.

***Saving American Manufacturing* demonstrates that there are opportunities being created by globalization and we can compete.** This fact is underscored by many stories of progressive small and midsize manufacturers who are growing despite the obstacles of globalization.

CCAI Training Manuals - \$35 each or \$165 for the set

The Chemical Coaters Association International publishes highly recommended training manuals for the organic finisher. Titles include Liquid Organic Coatings, Liquid Coatings Application Equipment; Paint Pretreatment; Powder Coating and System Design.

(NOTE: Electrodeposition is out of stock and currently not available)

All manuals, authored by CCAI Technical Director Rodger Talbert along with industry experts, are updated regularly to provide the industry with useful and informative training manuals. Ever finishing shop should have a set of the manuals as a training reference. The Paint Pretreatment and Powder Coating Manuals are also available in Spanish.
